

IMPLANTS: A NEW SMILE

Comfort and confidence again

Whether you're missing one or all of your teeth, there's now an exciting option that will help you smile with confidence again. Thousands of people are flashing smiles that have been beautified by implants, a fabulous tooth replacement technique that can be performed right here in our office. Implants are made of special biomaterials that are surgically placed in the jawbone under your gumline. After a few months the implant becomes anchored to the surrounding bone. A natural-looking replacement tooth is then permanently attached to the implant to replace the form and function of a real tooth. Implants can be used to stabilize dentures and bridges, replace just one tooth or to rebuild an entire jaw of missing teeth. The best part is that they look and feel just like natural teeth. Dental implants are reliable. Patients have retained them for more than twenty years with a better than 90% success rate. Most patients can receive implant treatments right in our office. We will use a local anesthetic to ensure comfort during the procedure. Dental implants have helped thousands of people to eat, smile and speak with renewed self-confidence. Patients who practice good oral home care and regular dental checkups can enjoy implants that last a lifetime. We can help you decide if a dental implant is right for you. The investment in your smile is well worthwhile.

Our office is now closed for the Christmas break and will reopen on January 5, 2010. Our answering service will still be available to take messages and relay them to Dr. Mahoney. We hope you have a safe and happy holiday season.
